

# Etc240 Labelling Machine

80 Kg

1100 mm

800 mm

AISI 304 stainless steel frame  
Round / square bottles  
Diameter of the bottles up to 112mm  
Side of the square bottles: 65-75mm  
Self-sticking labels located on a band wound round on a bobbin  
Inner diameter of the bobbin from 65mm to 75mm  
Maximum external diameter of the bobbin: 200mm  
Maximum height of the band: 140mm  
It can apply both front-and back labels  
It is preferable to use rectangular labels  
Possibility to use labels which wind round the bottles (only round bottles)  
Front-and back labels must be located on the same band  
The labelling time is about 3 seconds

## OPTIONAL

Stainless steel L model wheeled support  
Stamping device

Label sensor for already labelled ROUND bottles  
Inverter for 110 Volt, 60 Hz feeding

## ELECTRIC STARTING

230 Volt, 50 Hz mono-phase motor

# Ktc600 Labelling Machine

260 Kg

1840 mm

840 mm

2440 mm

AISI 304 stainless steel frame  
The Ktc600 is equipped with a system that controls the incoming of the bottles, a distributor of capsules, a thermic head and a labelling station  
Self-sticking labels located on a band wound round on a bobbin  
This machine can apply both front-and back labels which can be located on the same bobbin or on two separate bobbins that can be adjusted in height separately  
Inner diameter of the bobbin from 65mm to 75mm  
Maximum external diameter of the bobbin: 200mm  
Maximum height of the band: 140mm  
It is preferable to use rectangular labels  
Possibility to use labels which wind round the bottles  
Diameter of the bottles up to 85mm  
Height of the bottles up to 375mm  
The output per hour is about 850 bottles

## OPTIONAL

Stamping device  
Fitting for special bottles

Label sensor for already labelled bottles  
Inverter for 110 Volt, 60 Hz feeding

## ELECTRIC STARTING

230 Volt, 50 Hz mono-phase motor

## PNEUMATIC STARTING

Air consumption (6 bar): 8,2 NI/min
